A comprehensive suite of logical solutions for your in-house e-doc management strategy.

DocLogic™

DocLogic™ offers you the industry standard for independent, in-house electronic document management systems. Select this solution, and you'll join the hundreds of clients across the nation who know that DocLogic™ is the logical solution for their in-house e-Document Strategy.

[2020COLD](#) – Store years of reports or client statements and perform extensive searches to locate critical information using Windows or a browser.

[2020DOC](#) – Eliminate expensive physical storage and research costs with a robust image system for long-term document storage and retrieval--you have any document at your finger tips.

[2020iDOC](#) – Enables your employees to access client's statements and checks, as well as other imaging files securely over the intranet.

[2020eDOC](#) – This Member Document Portal enables your members access to their account statements and documents securely via the internet.

[ProDOC Forms](#) -- Imaging and eSignature technology for any document or form: automated electronic creation, capture and storage of forms incorporating client signatures.

[ProDOC Receipts](#) – Imaging and eSignature Technology for Receipts: Electronic creation, capture and storage of receipt information, including the client's signature.

idocVAULT™

Your online e-document strategy solution.

idocVAULT™ is an online imaging system for organizations who want to save money, but don't want to manage the in-house system themselves. This innovative solution provides automated storage and recall of reports, statements, electronically captured and stored receipts, loan documents, signature cards and photo ID's—DocLogic™ in service bureau form. Capture, save and research reports and client statements using eReports and eStatements, or capture signatures on receipts or documents using eReceipts™ or eForms™ . Images are stored in world class data centers, ready for your authorized access. iDocVAULT™ offers many of the options of DocLogic™, its in-house counterpart, and is the perfect solution for smaller budgets.

CHECK²¹ LOGIC Logical solutions for Check21 processing including check image capture, cash letter transmission to the check clearinghouse, summary report reporting, and check image storage.

CheckLogic™ is a simple to use, high-quality, cost efficient solution for your branch check capture and electronic image forward processing. Check image readers capture draft and internal document information. MICR line and courtesy amount information is then converted into a X9.37 file format for electronic forward clearing, and internal document information is captured to facilitate balancing and check image retrieval.

CheckLogic™ integration with eDOC Innovation's state-of-the-art imaging system, 2020DOC, allows you to retrieve a copy of the draft item any time necessary. CheckLogic's balancing reports record the teller, check processor and branch location for full-feature balancing capability.

CheckLogic™ Lite extends the power and ease of CheckLogic™ to members of all kinds--merchants, churches, and natural person members--to make deposits from their homes or businesses. Its an easy to manage, remote check capture solution for your credit union. A critical component to an overall e-Document Strategy, CheckLogic™ Lite is a high-quality, cost efficient, internet based software solution to simplify remote deposit. Your member simply places a check into a scanner at their location and scans the check

using CheckLogic™ Lite's advanced capture and electronic image forward processing. CheckLogic™ Lite's intelligence informs you of the deposit request and allows you to authorize the deposit. No middlemen or other financial institutions stand between you and your members.

iSync²⁰²⁰ Logical solutions for business continuity

202iSync™ is a comprehensive business continuity solution; invaluable when your organization needs to recover data, images, systems, and more. More than just a redundant back up, when you need to be up and running in minutes, iSync provides complete disaster recovery whether it's only your local hardware or your entire building that has been lost. The iSync system is a series of redundant local and nationwide hardware repositories connected by automated software that securely protects the data and systems you need to be back to business in minutes. Combined with a 24/7 Network Operations Center that provides around the clock monitoring and support, you know your recovery plan is working.
